

## How to play

1. Split into groups of 5-6 people.
2. Place one card in the centre, with the word-free side up.
3. Shuffle the remaining cards and deal them evenly to all players, with the word-free side up.
4. Players should not look through their cards, and should hold their cards with the word-free side up.
5. Begin playing – when a player finds a symbol on their card which matches the one in the middle, they say the name of the symbol and place the card down.
6. They flip the top two cards, and read out the two words on the matched symbol.
7. They then answer the below question... If they are the same word, then the player just describes that element.
8. The first player to run out of cards wins.

What is the connection between the two elements on the cards? How do these complement or compete with each other?
